

SENATOR™ PROSTHETIC FOOT

SOPHISTICATED SIMPLICITY.

The Senator Prosthetic Foot is a lightweight, economical, energy-returning product that shares composite engineering features with our advanced Freedom Series™ prosthetic feet. It is designed to meet the needs of low to moderately active K3 amputees seeking a prosthetic foot that will allow them to ambulate at varied speeds and participate in daily activities such as bicycling, golfing, hiking, or even jogging.

AN EXCELLENT VALUE AT AN AFFORDABLE PRICE

The Senator Prosthetic Foot combines sophisticated carbon fiber with an integral connector for a lightweight, durable, dynamic-response foot that is simple to fit and finish. It is sophisticated simplicity at its best, delivering substantial energy-return and smooth rollover.

MAJOR BENEFITS

- Lightweight, energy-return design facilitates smooth, easy stride so the user can walk farther, faster using less energy
- Integral male pyramid attachment simplifies the fitting process
- Simulated ankle motion provides a stable base of support throughout stance phase
- Foot is not pre-bonded to the foot shell, allowing access to the foot module and simplifying the use of heel wedges to improve alignment
- Six stiffness categories and low or moderate impact levels enhance customization to ensure ultimate comfort and stability
- Ideal for low to moderately active amputees weighing up to 300 lbs (136 kg), enhancing the range of amputees who can utilize this technology
- Low maintenance, durable design provides peace of mind to the clinician and the user
